

left_rot()

 dexterindustries.com/GoPiGo/programming__trashed/python-programming-for-the-raspberry-pi-gopigo__trashed/left_rot/

Rotate GoPiGo Left

The left motor starts rotating back and the right motor starts rotating forward. This makes the GoPiGo rotate towards left at the same spot.

Syntax

```
left_rot()
```

Parameter:

None

Return:

1 on success

-1 on error

Example

```
from gopigo import *  
left_rot()
```
